

A new EU regulation will soon come into effect that impacts how all organisations collect, hold and process people's personal data. The EU General Data Protection Regulation (GDPR) is a significant piece of European legislation which will come into force on 25 May 2018. It builds on existing data protection laws, strengthening the rights that EU individuals have over their personal data, and creating a single data protection approach across Europe.

As we approach May 2018, CCP Building Products Ltd is focused on its GDPR compliance responsibilities. During our implementation period, we are evaluating new requirements and restrictions imposed by GDPR and will take any action necessary to ensure that we handle all data in compliance with the applicable law.

CCP Building Products Ltd is committed to meeting any contractual obligations for procedures, products and services and is approaching GDPR compliance on three main fronts:

1. To ensure our own compliance as a company that holds and processes people's personal data.
2. To ensure our partners and suppliers adhere to the highest standards of compliance and GDPR regulation.
3. To ensure that our service solutions all support our customers' GDPR compliance efforts.

GDPR Compliance

CCP Building Products Ltd have implemented a Project Team who are undertaking a full review of all internal security and privacy policies to ensure that all personal data within, or passing through the company, will be handled in accordance with GDPR regulations.

We will implement the relevant tools and practises to ensure the safeguarding of any data handled by CCP Building Products Ltd and all its employees.

All employees will be provided with the relevant training, so they are aware of all GDPR procedures, restrictions and the right to be forgotten.

Suppliers

CCP Building Products Ltd will undertake a review of all supplier and third-party contracts and arrangements to ensure that all our partners continue to apply the same high standards of data protection.
